Curv-Rite™ aluminum edging was designed by landscape architects and landscape contractors to offer greater flexibility in design and installation over any other edging material.

Curv-Rite’s innovative design creates smooth curves with interlocking features for ease of installation.

The Curv-Rite design features include:

- Durable aluminum alloy.
- Secure telescoping connection.
- Vertically symmetrical cross-section.
- Flexible and resilient structure.
- Minimal frost heave.
- Structurally strong stakes.
- Versatile connectors – allow easy construction of corners, angles, and tees.
Easy Installation

Curv-Rite’s symmetrical telescoping design is easier to install, saving you time, product and money.

- The edging helps form bedlines before installation.
- Telescoping design holds joints together and eliminates the need for connector stakes or pins.
- It eliminates the need to cut edging for small length adjustments.
- Circles are easily formed with one section of edging by interlocking opposite ends together.
- Special connectors make corner or angle installations simple and precise.

Optiona connectors from Curv-Rite Aluminum Edging encourage unlimited design possibilities; such as octagons, pentagons, unique shapes... anything a creative landscape designer can imagine!

Design II: CRDII

Paver Edging

Design II offers a unique sub-surface staking mechanism ideal for paver areas as well as landscape borders. When installing pavers, Design II:
- Defines layout prior to installation
- Acts as a rigid screed form during installation
- Retains pavers securely after installation
Technical Data and Specifications

To Specify: Select design, thickness, depth, length & finish. Include 1-800-366-2878 to expedite service.

Curv-Rite edging products are typically used to define and contain plant bed areas, retain concrete/brick pavers, walking paths, jogging trails, running tracks, maintenance strips, driveways and as asphalt borders.

*These are minimum radii to be used as a guide for flexibility standards  
**Additional depth adds increased strength and stability.

Design I: 12" long stakes with 1-1/4" retaining lip to engage edging. We recommend one (1) stake every 48" of edging.

Design II: 12" long stakes with sub-surface retaining lip. We recommend one (1) stake every 38" of edging.

Design II - 5" Depth: Special order only.

Special Connectors: Angles, Corners & Tees  
Specify Depth & Finish

Material: 6063-T6 Aluminum Alloy (Edging & Connectors)  
6061-T6 Aluminum Alloy (Stakes)

Technical Specification: Landscape bed edging shall be CURV-RITE DESIGN 2: CRD2 (THICKNESS) inch thick aluminum edging, (DEPTH) inches deep with a (FINISH) as manufactured by CURV-RITE, INC. Grand Rapids, MI: 1-800-366-2878. Sixteen (16) foot sections shall be used with (1) subsurface stake per (38) inches of edging. Edging shall be aluminum alloy 6063-T6 with stakes being 6061-T6. Edging shall have a minimum of (2) inches of interlocking overlap between sections. Install per manufacturer's specifications with top of edging 1/4" to 1/2" above compacted finish grade. Finish grade to be compacted on either side of edging to maintain stability.
